Along the HP Way...

"As HP's chief communications officer, I oversaw many announcements of major organizational changes designed to find the sweet spot between centralized versus decentralized operations. The language rarely changed. In the former case, we'd talk about the benefits of 'greater integration and coordination,' making it easier for customers to do business with a single, customer-facing organization. In the latter case, we'd talk about becoming 'more nimble and tightly focused' on customer needs in the individual markets we served.

"Over the years, the pendulum swung back and forth many times. We kept past announcements handy and got pretty good at refreshing wording we'd used in years past, as the issues and rationale didn't change much."

--Roy Verley's memoir of 21 years at Corporate also includes a hard-won list of "Communication rules to live by."
